- **Subject:** Front End Development
- **Skills:** CSS, JavaScript, React

## EXPERIENCE

### Snowa / Full Stack Web Developer

June 2021 – Present | Full Time

I was mostly involved in the organizational projects required by the **Entekhab Group**, as well as the development of the websites of its brands, i.e. **Snowa, Daewoo and Bost**.

One of the biggest projects that I did here was the development of the customer panel of **Snowa customer club** as well as its management panel.

I did various other projects such as **GTM monitoring system, live lottery system** and also **online chat system** for this company.

### Alma Card / Front End Developer

Jan 2018 - Feb 2020 | Full Time in Esfahan and Tehran

The most important project that I did for Alma company was the front-end development of the **Shokolat Loyalty software**, which was done using **Laravel**.

### Remote working / Front End Developer

July 2020 – Apr 2021 | Remote and Full Time

In cooperation with a software team, I was involved in the front end development of web projects needed by the country of **Qatar**. These projects were usually developed with the **Django framework**. I also did a relatively large project with them, which was a **Virtual university**.

### Jumbula / Website Designer

January 2014 - April 2014 | Part Time

This was my first experience working in person for a company. My activity revolved around the development of websites by **Wordpress** for various businesses in the **United States**
